

Serial No. 10/782,834
Amdt filed Sept. 6, 2005
In response to OA dated April 5, 2005

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

1-3. (Cancelled).

4. **(Currently amended)** The device according to claim 3, In a device for supplying fuel from a tank to an internal combustion engine, including a fuel-supply pump having an outlet fitting and being fastened by means of a mount, the improvement wherein the mount (27) is embodied as a rigid conduit having a first fuel supply line section (8.1) connected to the outlet fitting (21) of the fuel-supply pump (3), wherein the mount (27) comprises a mount fitting (28) with a mount conduit (25) that feeds with a connection opening (31) into the first fuel supply line section (8.1), and wherein the outlet fitting (21) of the fuel-supply pump (3) is inserted into the mount conduit (25) and extends through a mounting element (41) provided in the connection opening (31).

5. **(Original)** The device according to claim 4, wherein the outlet fitting (21) comprises a mounting groove (34), and wherein the mounting element (41) engages the mounting groove (34) in detent fashion.

Serial No. 10/782,834
Am dt filed Sept. 6, 2005
In response to OA dated April 5, 2005

6. **(Original)** The device according to claim 4, wherein the mounting element (41) is made of an elastic material.

7. **(Original)** The device according to claim 4, wherein the mounting element (41) is flat and (disk-shaped).

8. **(Original)** The device according to claim 4, wherein the mounting element (41) is a curved shaped part.

9. **(Original)** The device according to claim 4, wherein in the connection opening (31), the mount (27) comprises a first shoulder (35) against which the mounting element (41) rests, and a second shoulder (39) fixing the mounting element (41) against the first shoulder (35) in cantilevered fashion.

10. **(Original)** The device according to claim 4, wherein in the connection opening (31), the mount (27) comprises a first shoulder (35) against which the mounting element (41) rests, and at least one hold-down element (55) fixing the mounting element (41) against the first shoulder (35).

11-20. (Canceled).
